

Western Sydney Stadium

Project update January 2017

Overview

The new Western Sydney Stadium is a 30,000 seat world class venue that will revolutionise the spectator experience.

The stadium is the first project to be delivered under the NSW Government's \$1.6 billion Stadia Strategy to improve sporting infrastructure across the state.

The new Western Sydney Stadium will:

- » be able to cater for bigger crowds, provide an improved game day experience and bring major benefits to the Western Sydney economy
- » generate approximately 1,200 jobs during construction and between 600 and 900 jobs once operational for sporting event days and major events
- » cater for a range of sporting and community uses within the precinct.

The new stadium will be built on the existing Pirtek Stadium site in Parramatta.

Infrastructure NSW is delivering the project in partnership with Venues NSW on behalf of the NSW Government. Lendlease has been awarded the contract to design and construct the new stadium.

Planning update

Stage one planning approval for the project, which covered concept proposal and demolition work, was granted in December 2016.

The second stage of planning approval for the project involves detailed design of the new stadium as well as construction and operation.

A planning application will be submitted in early 2017 and the community will be invited to comment on the design when the application is placed on public display in early 2017.

Site establishment

Work to establish the construction site at Pirtek Stadium has started. It will take about three weeks to complete, weather permitting, and will include:

- » removing and relocating utilities including electricity, communication, water and sewerage
- » installing temporary fencing and gates
- » installing temporary buildings such as site offices and employee amenities
- » establishing laydown areas and stock pile sites.

Our working hours will be from:

- » 7am to 6pm, Monday to Friday
- » 8am to 1pm on Saturdays.

Construction vehicles will access the site via O'Connell Street.

Parking at the stadium's north-east and western car parks will no longer be available until the new stadium is complete.

More information on the demolition and construction of the new stadium will be provided to the community before work starts.
